

URUKUNDAPPA GUDISE

SENIOR AI & CLOUD SOLUTION ARCHITECT | Azure/AWS • Platform Engineering • AI/GenAI

Bangalore, India | 22+ Years IT Experience | +91 7259962234 | gudise.chandu1155@gmail.com | reach2uru1155@gmail.com gudise.chandu1155@gmail.com reach2uru1155@gmail.com

EXECUTIVE PROFILE

- Senior Cloud Solution Architect and Presales Leader with 22+ years of experience across enterprise architecture, Microsoft Azure, AWS, cloud transformation, application modernization, distributed systems, data architecture and customer-facing consulting. Brings 10+ years of Azure architecture experience across IaaS/PaaS, hybrid and multi-cloud environments, .NET/C#, Python, APIs, microservices, ETL/data integration, RDBMS, data modelling, reporting, event-driven architecture, integration, security and DevSecOps. Experienced in translating complex business requirements into scalable, resilient, secure and cost-effective cloud, application and data solutions, architecture blueprints, roadmaps and implementation strategies.
- Experienced in solution definition, architecture governance, stakeholder discovery, technical workshops, architecture trade-offs, estimates and proposal support, with a strong focus on business value, delivery feasibility, reliability, security and long-term platform sustainability.
- Since June 2022, delivered 10+ enterprise projects using AI and Agentic AI-led approaches across requirements, architecture, design, development, testing and validation. Advanced hands-on Claude AI experience spanning Claude Code, Skills, Hooks, Agents, MCP integrations and Co-Work, alongside OpenAI/GPT, Gemini, GitHub Copilot, Python and Azure.
- Combines cloud architecture and hands-on engineering with platform automation, migration, security, governance, stakeholder leadership and measurable outcomes including ~40% infrastructure cost reduction, ~35% faster migration execution, ~30% reduction in architecture rework, 99.9% production availability, 100% SLA compliance and 4.9/5 CSAT across 5+ enterprise engagements.

CLOUD SOLUTION ARCHITECTURE & AI-DRIVEN DELIVERY | JUNE 2022 – PRESENT

- Lead end-to-end cloud solution architecture across the SDLC, translating business and technical requirements into target architectures, integration designs, technology choices, NFRs, migration approaches and implementation-ready solutions; apply AI to accelerate engineering productivity while maintaining governance, traceability, quality and production readiness.
- Use Claude capabilities including Prompt Engineering, Document Analysis, Research & Reports, Data Analysis, Task Automation, Artifacts, Workflow Design, Team Collaboration, Advanced Prompting and end-to-end Full Workflow patterns to turn repeatable architecture, engineering and operational tasks into structured AI-assisted workflows.
- Apply Claude Code, Skills, Hooks, Agents, MCP and Co-Work with OpenAI/GPT, Gemini, GitHub Copilot, Python and Azure to support architecture, modernization, code analysis, test generation, validation, automation and solution delivery.

SELECTED BUSINESS & PLATFORM ENGINEERING IMPACT

- ~40% infrastructure cost reduction through cloud architecture and optimization
- ~35% faster migration execution through automation and standardized architecture
- ~30% reduction in architecture rework through governance and reusable patterns
- 99.9% production availability with zero critical security findings
- 100% SLA compliance across 5+ enterprise engagements
- 4.9/5 customer satisfaction; 10+ AI/Agentic AI-led projects since June 2022

PROFESSIONAL EXPERIENCE

InfoVision | Senior Solutions Architect – AI, Azure & Digital Transformation | Jan 2026 – Present

- Lead AI-driven SDLC adoption across teams and projects to accelerate delivery, improve quality, reduce technical risk and move struggling applications from “Red” to “Green”.
- Lead Azure solution architecture for enterprise cloud, AI/Agentic AI, modernization and digital transformation programs; define scalable, secure and resilient target architectures aligned to business objectives, platform constraints and delivery needs.
- Create architecture blueprints, solution options and target-state roadmaps; apply microservices, API-first, event-driven and distributed-system patterns with explicit scalability, reliability, security and cost trade-offs.

CORE COMPETENCIES

- Cloud Solution Architecture & Platform Engineering
- Azure / AWS Hybrid & Multi-Cloud Architecture
- Cloud-Native, Distributed & Resilient Systems
- Cloud Migration, Modernization & Integration
- Architecture Blueprints, Standards & Governance
- Microservices, API-First & Event-Driven Architecture
- Security, IAM, Networking & Zero Trust
- DevOps, CI/CD & Infrastructure as Code
- Reliability, SLA & Production Readiness

AI & CLAUDE ENGINEERING

- Claude AI & Agentic Engineering — advanced hands-on
- Claude Code, Skills, Hooks, Agents, MCP & Co-Work
- Prompt Engineering & Advanced Prompting
- Document/Data Analysis; Research & Reports
- Task Automation, Artifacts & Computer Use
- Workflow Design, Team Collaboration & Full AI Workflow
- OpenAI/GPT, Gemini, GitHub Copilot, Azure Foundry
- Python 3.12, FastAPI, pandas, openpyxl
- AI-assisted architecture, engineering & productivity analytics

AZURE & CLOUD

- Azure CAF & Well-Architected Framework

URUKUNDAPPA GUDISE

SENIOR AI & CLOUD SOLUTION ARCHITECT | Azure/AWS • Platform Engineering • AI/GenAI

Bangalore, India | 22+ Years IT Experience | +91 7259962234 | gudise.chandu1155@gmail.com | reach2uru1155@gmail.com | gudise.chandu1155@gmail.com | reach2uru1155@gmail.com

- Lead architecture workshops, technical reviews, demonstrations, risk discussions and stakeholder engagements; communicate architectural decisions and trade-offs to business, product, engineering, DevOps and security stakeholders.
- Drive AI-augmented brownfield and greenfield delivery using Azure, .NET and Python, with automation, security, governance, testing and production-readiness controls.

Collabera Digital | Principal Solutions Architect – Cloud & Digital Platforms | Jun 2022 – Dec 2025

- Led AI and Agentic AI solution delivery using Python and modern full-stack technologies alongside Azure cloud modernization and integration initiatives.
- Architected legacy AWS and Azure migrations using CAF-aligned and Zero Trust architectures; designed hybrid connectivity, identity, networking and integration foundations, delivering 99.9% production availability with zero critical security findings.
- Established Azure architecture standards, landing-zone blueprints, governance guardrails and security baselines, reducing architecture rework by ~30% and improving consistency across enterprise solutions.
- Automated Azure infrastructure provisioning using Terraform, ARM and CI/CD pipelines, accelerating migration timelines by ~35% and reducing infrastructure costs by ~40%; promoted repeatable IaC and deployment practices.

HCL Australia Ltd | Lead Solution Architect | Feb 2019 – May 2022

- Designed and governed Azure architectures for enterprise modernization across application, data, security and integration foundations; delivered 5+ engagements with 100% SLA compliance and 4.9/5 CSAT.
- Architected multi-subscription Azure environments with centralized identity, networking and security baselines aligned to the Azure Well-Architected Framework; addressed reliability, performance and operational requirements.
- Designed hybrid-cloud and identity-integrated solutions; collaborated with architecture, security, DevOps and delivery teams to align technical strategies, dependencies and operational needs.

HCL India Ltd | ASP.NET Application Architect | Jun 2016 – Feb 2019

- Architected enterprise applications, APIs and distributed integration components using ASP.NET, .NET Core, SQL Server and Oracle; led legacy migration and decommissioning initiatives.
- Delivered secure migration and archival solutions for structured and unstructured enterprise content using data modeling, integration and production-readiness practices.
- Built REST APIs, data-access layers and middleware components supporting enterprise integration, testing, troubleshooting and production readiness.

Sonata Software, Bangalore | Senior Technical Lead | Nov 2013 – Jun 2016

- Led proposal-to-deployment delivery and designed MVC N-tier applications with RESTful web services, dashboards and reporting.
- Designed Azure solutions using Queues, Logic Apps, Web Apps, Functions, BizTalk, ETL, WCF and Azure Storage; applied integration and distributed-processing patterns.
- Implemented CI/DevOps automation using TeamCity and Octopus, improving deployment repeatability and release efficiency.

Mphasis, an HP Company, Bangalore | Module Lead | Feb 2007 – Nov 2013

- Mentored engineers and provided architecture, development, troubleshooting and delivery guidance across the SDLC.
- Owned application architecture using Agile/TDD; delivered enterprise solutions emphasizing modular design, maintainability and quality.
- Addressed application security, database performance and reporting; created normalized data models and supported production issue resolution.

- IaaS / PaaS / Hybrid / Multi-Cloud
- Landing Zones, architecture standards & governance
- Entra ID, IAM, RBAC, Zero Trust
- VNet, VPN, NSG, WAF, Private Endpoints
- Terraform, ARM, Azure DevOps, GitHub Actions

APPLICATION & DATA

- .NET 8, .NET Core, C#, ASP.NET, Python
- REST APIs, Microservices,DDD, Clean Architecture
- Azure SQL, Cosmos DB, SQL Server, Oracle, Redis
- Kafka, RabbitMQ, Service Bus, Event Hub, IoT Hub
- PostgreSQL, Azure Data Explorer, ETL & data integration

INDUSTRY & DOMAIN

- BFSI & Capital Markets
- Telecom
- Healthcare
- Retail
- Supply Chain
- Transportation
- Hospitality
- Corporate Finance
- Data & Reporting
- Risk & Compliance

EDUCATION

- MCA – Computer Applications | RIIMS, Tirupathi • 2003 • 70%
- B.Sc – Electronics, Mathematics & Physics | AASC, Adoni • 1998 • 74%

CERTIFICATIONS

- Azure Solutions Architect Expert (AZ-303/AZ-304/AZ-305)
- Azure DevOps Engineer Expert (AZ-400)
- Azure Administrator Associate (AZ-104)
- MCTS – ASP.NET 3.5 | Microsoft Certified Professionals
