

URUKUNDAPPA GUDISE

AZURE CLOUD ARCHITECT | AZURE PLATFORM • CLOUD MODERNIZATION • SECURITY • DEVOPS

Bangalore, India | 22+ Years IT Experience | +91 7259962234 | gudise.chandu1155@gmail.com | reach2uru1155@gmail.com

EXECUTIVE PROFILE

- Azure Cloud Architect / Principal Solution Architect with 22+ years of software engineering, cloud architecture and technology leadership experience, including 10+ years architecting Microsoft Azure solutions. Strong in enterprise cloud architecture, Azure platform services, networking, security, automation, CI/CD, distributed applications and modernization.
- Experienced in designing Azure solutions across commercial cloud environments, leading on-premises-to-Azure migrations, developing Azure service roadmaps, evaluating cloud services against business requirements and establishing secure reference architectures, controls, capacity plans and operational standards with security and enterprise architecture teams.
- Hands-on with Azure Virtual Networks, NSGs, VPN/ExpressRoute patterns, load balancing, private endpoints, AKS, App Services, Functions, Storage, Azure SQL, Cosmos DB, API Management, Service Bus, Azure Monitor, Log Analytics and Application Insights. Strong automation using Terraform, ARM/Bicep, Azure CLI, PowerShell, Python, .NET, REST APIs, JSON/YAML and Azure DevOps CI/CD.
- Combines technical leadership, application and infrastructure architecture, analytical problem solving and stakeholder engagement with measurable outcomes including ~40% infrastructure cost reduction, ~35% faster migration execution, ~30% reduction in architecture rework, 99.9% production availability, zero critical security findings and 100% SLA compliance.

AZURE CLOUD ARCHITECTURE, PLATFORM SERVICES & APPLICATION MODERNIZATION | JUNE 2022 – PRESENT

- Architect and govern enterprise Azure solutions across application, infrastructure, data, networking and security domains; define target-state architecture, service adoption roadmaps, capacity requirements and reference architectures aligned to enterprise technology strategy and business outcomes.
- Lead on-premises-to-Azure migration and modernization using rehost, replatform and refactor approaches; design scalable distributed applications with AKS, App Services, APIs, microservices, Azure Storage, Azure SQL, Cosmos DB and Service Bus while addressing resiliency, performance, availability and operational requirements.
- Partner with security, platform, infrastructure, application and DevOps teams to evaluate Azure services, establish secure deployment controls, automate infrastructure and application delivery, troubleshoot complex production issues and support documentation, training, usability and operational readiness.

SELECTED BUSINESS & TRANSFORMATION IMPACT

- ~40% infrastructure cost reduction through cloud architecture and optimization
- ~35% faster migration execution through automation and standardized architecture
- ~30% reduction in architecture rework through governance and reusable patterns
- 99.9% production availability with zero critical security findings
- 100% SLA compliance across 5+ enterprise engagements
- 4.9/5 customer satisfaction; 10+ AI/Agentic AI-led projects since June 2022

PROFESSIONAL EXPERIENCE

InfoVision | Azure Cloud Architect – Cloud Platform & Modernization | Jan 2026 – Present

- Lead Azure cloud architecture for enterprise platform and application modernization initiatives, working with Principal Architects, IT, GCIO/business technology, Security, Infrastructure, Application, Data and DevOps teams to translate business requirements into secure, scalable and operationally ready Azure solutions.
- Design Azure solutions using Azure Virtual Networks, NSGs, VPN/ExpressRoute connectivity, load balancing, private endpoints, AKS, App Services, Azure Storage, Azure SQL, Cosmos DB, API Management and Azure Service Bus; define distributed application, networking, data and integration architectures.
- Lead on-premises-to-Azure migrations and modernization using assessment, dependency analysis, migration waves and rehost/replatform/refactor approaches; develop Azure service roadmaps, landing-zone patterns, capacity plans and reference architectures aligned to security, governance, resiliency and long-term enterprise cloud strategy.
- Automate infrastructure and application deployments using Terraform, ARM/Bicep, Azure CLI, PowerShell, Python, .NET, REST APIs, JSON/YAML and Azure DevOps CI/CD; use Docker/Kubernetes and AKS deployment patterns, Azure Monitor, Log Analytics and Application Insights for observability, troubleshooting and operational support.

CORE COMPETENCIES

- Azure Cloud Architecture & Platform Services
- Cloud Migration & Modernization
- Enterprise Cloud Roadmaps & Reference Architecture
- Capacity Planning & Operational Readiness
- Cloud Networking & Distributed Computing
- Security Architecture & Governance
- Technical Leadership & Stakeholder Management
- AZURE PLATFORM

Azure VNet, NSG, VPN & ExpressRoute

- Load Balancing, Private Endpoints & WAF
- AKS, App Services & Functions
- Azure Storage, Azure SQL & Cosmos DB
- API Management & Service Bus
- Azure Monitor, Log Analytics & App Insights
- MIGRATION & MODERNIZATION
- On-Premises → Azure Migration
- Re-host, Re-platform & Refactor
- Landing Zones & Reference Architecture

Resiliency, Availability & DR

- AUTOMATION & DEVOPS
- Terraform, ARM Templates & Bicep
- Azure DevOps, CI/CD & Agile
- Azure CLI, PowerShell & REST APIs
- Python, .NET, JSON & YAML
- Docker & Kubernetes
- Infrastructure as Code & Automation

SECURITY & ARCHITECTURE

- Entra ID, OAuth2, IAM & RBAC
- Zero Trust & Security Architecture
- Security Configuration Baselines

URUKUNDAPPA GUDISE

AZURE CLOUD ARCHITECT | AZURE PLATFORM • CLOUD MODERNIZATION • SECURITY • DEVOPS

Bangalore, India | 22+ Years IT Experience | +91 7259962234 | gudise.chandu1155@gmail.com | reach2uru1155@gmail.com

- Partner with corporate security on security architecture, risk assessment, security configuration baselines and remediation; conduct technical evaluations of Azure services, architecture reviews and design walkthroughs, document solutions, train technical teams and drive Agile delivery, production readiness and continuous improvement.

Collabera Digital | Principal Solutions Architect – Cloud & Digital Platforms | Jun 2022 – Dec 2025

- Led AI and Agentic AI solution delivery using Python and modern full-stack technologies alongside AWS/Azure cloud modernization and integration initiatives; supported solution definition and customer-facing technical consulting.
- Architected legacy AWS and Azure migrations using cloud-native, CAF-aligned and Zero Trust architectures; designed hybrid connectivity, identity, networking and integration foundations, delivering 99.9% production availability with zero critical security findings.
- Established architecture standards, landing-zone blueprints, governance guardrails and security baselines; evaluated technology choices and reusable patterns to reduce architecture rework by ~30% and improve consistency across enterprise solutions.
- Automated cloud infrastructure provisioning using Terraform, ARM and CI/CD pipelines, accelerating migration timelines by ~35% and reducing infrastructure costs by ~40%; promoted repeatable IaC and deployment practices.

HCL Australia Ltd | Lead Solution Architect | Feb 2019 – May 2022

- Designed and governed cloud architectures for enterprise modernization across application, data, security and integration foundations; delivered 5+ engagements with 100% SLA compliance and 4.9/5 CSAT.
- Architected multi-subscription Azure environments with centralized identity, networking and security baselines aligned to the Azure Well-Architected Framework; addressed reliability, performance, scalability and operational requirements.
- Designed hybrid-cloud and identity-integrated solutions; collaborated with architecture, security, DevOps and delivery teams to align technical strategies, dependencies and operational needs.

HCL India Ltd | ASP.NET Application Architect | Jun 2016 – Feb 2019

- Architected enterprise applications and REST APIs using ASP.NET, .NET Core, C#, MVC, SQL Server and Oracle; applied microservices/integration patterns and led legacy migration and decommissioning initiatives.
- Designed secure application and data solutions using data modeling, SQL, integration and production-readiness practices; addressed performance, maintainability and operational requirements.
- Built REST APIs, data-access layers and middleware components supporting enterprise integration, testing, troubleshooting, code quality and production readiness.

Sonata Software, Bangalore | Senior Technical Lead | Nov 2013 – Jun 2016

- Led proposal-to-deployment delivery, translating requirements into solution designs and technical proposals, and designed MVC N-tier applications with RESTful web services, dashboards and reporting.
- Designed Azure solutions using Queues, Logic Apps, Web Apps, Functions, BizTalk, ETL, WCF and Azure Storage; applied integration and distributed-processing patterns.
- Implemented CI/DevOps automation using TeamCity and Octopus, improving deployment repeatability and release efficiency.

MphasiS, an HP Company, Bangalore | Module Lead | Feb 2007 – Nov 2013

- Mentored engineers and provided architecture, development, troubleshooting and delivery guidance across the SDLC.
- Owned application architecture using Agile/TDD; delivered enterprise solutions emphasizing modular design, maintainability, coding standards and quality.
- Addressed application security, database performance and reporting; created normalized data models and supported production issue resolution.

Magna Infotech, Bangalore | Module Lead | Feb 2006 – Feb 2007

- Requirements understanding, construction and unit testing and deployment.

- Risk Assessment & Remediation
- NIST-Aligned Architecture Principles

Architecture Governance & Assurance

- APPLICATION & INTEGRATION
- .NET 8+, .NET Core, C# & ASP.NET
- REST APIs & Enterprise Integration
- Microservices, DDD & CQRS
- Event-Driven Architecture & Distributed Systems
- Data Architecture & Integration
- AI / DATA
- Azure OpenAI & Agentic AI
- Azure ML & AI Application Architecture
- Python, FastAPI, pandas & Data Pipelines

LLM / RAG & AI-enabled Applications

- Machine Learning / AI Solution Integration
- LEADERSHIP & DELIVERY

Technical Leadership & Architecture Reviews

- Business Requirements & Solution Analysis
- Customer / Executive Communication
- Documentation, Training & Knowledge Transfer
- Production Troubleshooting & Root Cause Analysis
- Cloud Service Evaluation & Onboarding
- Solution Roadmaps & Technical Governance
- Capacity Planning & Operational Readiness
